WHAT WERE THE FUND COSTS FOR THE PAST YEAR? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Institutional Class	\$93	0.90%

HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

During this fiscal year, the Fund gained 7.74% on its Institutional Class shares while the ICE BofA U.S. High Yield Total Return Index gained 15.66%, the ICE BofA U.S. Corporate Bond Index gained 14.13% and the ICE BofA 3-7 Year U.S. Treasury Index gained 9.07%. The Bloomberg U.S. Aggregate Bond Index, the Fund’s broad based securities market index, gained 11.57% over the same period.

Monthly investment results for the fiscal year ranged from -0.50% in June 2024 to 1.70% in December 2023. The Fund generated positive returns for eleven out of the twelve months during the fiscal year. The median monthly return for the fiscal year was 0.62% with an annualized standard deviation of 2.69%.

The Fund had positive contributions from interest income and had realized capital gains and unrealized losses during the period. 100% of the income was distributed for a 1-year dividend yield of 7.89%. The Fund’s subsidized 30-day SEC yield was 8.14% and unsubsidized 30-day SEC yield was 7.48%. The total return for the period was positive. Although the Fund’s NAV decreased from \$9.36 on September 30, 2023 to \$9.33 on September 30, 2024, that decrease was more than offset as the Fund distributed \$0.74 in income during the fiscal year.

As we have made reference to in all four CrossingBridge quarterly commentaries we published this past fiscal year (available on our website), credit spreads, both investment grade and high yield, have continued grinding tighter, recently hitting their tightest levels in 15 years. Even in the face of tight credit spreads and a highly uncertain interest rate market, we remain opportunistic and continue to pursue four main themes:

- 1) Floating rate debt – continuing to take advantage of the inverted yield curve
- 2) Foreign issuers – better credit characteristics with higher yields than U.S. counterparts
- 3) Event-driven debt – catalysts hold potential for higher rates of return
- 4) Higher credit quality issuers – leaning into investment grade opportunities

With this backdrop, throughout the fiscal year we had remained (and continue to remain) more defensively positioned, aiming to maintain attractive yields while leaning more toward investment grade debt. At the same time, we have maintained low durations and continue holding significant “dry powder” (**cash/cash equivalents/pre-merger SPACs/maturities of 90 days or less**) to 1) help protect capital while generating what we believe to be relatively attractive yields with the inverted yield curve, and 2) take advantage of opportunities as they arise.

As of September 30, 2024, the Fund’s net assets were weighted by category as follows: 16.96% in Short Term Securities, 7.18% in Event Driven, 25.84% in Interest Rate Sensitive, 38.17% in Core Value, 4.62% in Credit Opportunities, with the remaining 7.23% in cash and cash equivalents.

HOW DID THE FUND PERFORM SINCE INCEPTION?*

The \$10,000 chart reflects a hypothetical \$10,000 investment in the class of shared noted. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses were deducted.
