

CROSSINGBRIDGE
PRE-MERGER SPAC ETF (SPC)

MARCH 31, 2024

COMPANY

CrossingBridge Advisors, LLC (“CrossingBridge”) was founded in December 2016 and is a wholly owned subsidiary of ENDI Corp. (OTCQB: ENDI), which is a publicly-listed company controlled by Cohanzick Management, LLC (“Cohanzick”). Cohanzick was founded in 1996 by David Sherman. As of March 31, 2024, the assets under management for CrossingBridge was in excess of \$2.8 billion.

INVESTMENT FOCUS

The investment strategies for CrossingBridge include: ultra-short duration, low duration high yield, responsible credit, and special purpose acquisition companies (SPACs). These strategies primarily employ high yield and investment grade corporate debt as well as credit opportunities in event-driven securities, post re-org investments, and stressed & distressed debt.

EXPERIENCED TEAM

CrossingBridge has a deep and experienced team with 9 investment and 5 operational professionals. The average experience of the investment team is 20+ years and the average experience of the operations team is 15+ years.

STRATEGIC ALLIANCES

CrossingBridge sub-advises three mutual funds, two within the Brinker Capital Destinations Trust and the RiverPark Short Term High Yield Fund

OWNERSHIP

CrossingBridge is a wholly-owned subsidiary of ENDI Corp. (OTCQB: ENDI).

OBJECTIVE

The investment objective of the CrossingBridge Pre-Merger SPAC ETF (SPC) is to provide total returns consistent with the preservation of capital.

INVESTMENT

Pre-merger SPACs provide shareholder-friendly features that present an arbitrage opportunity for SPAC common stock shareholders. Given that SPAC shareholders have a full redemption right to their pro-rata share of the collateral trust account that is typically invested in U.S. government securities, the downside risks of pre-merger SPACs are significantly limited while also presenting the shareholders with potential equity upside.

PERSPECTIVE

We are prepared to sacrifice yield for a higher probability that principal will be repaid. Our guiding principle is that return of capital is more important than return on capital.

APPROACH

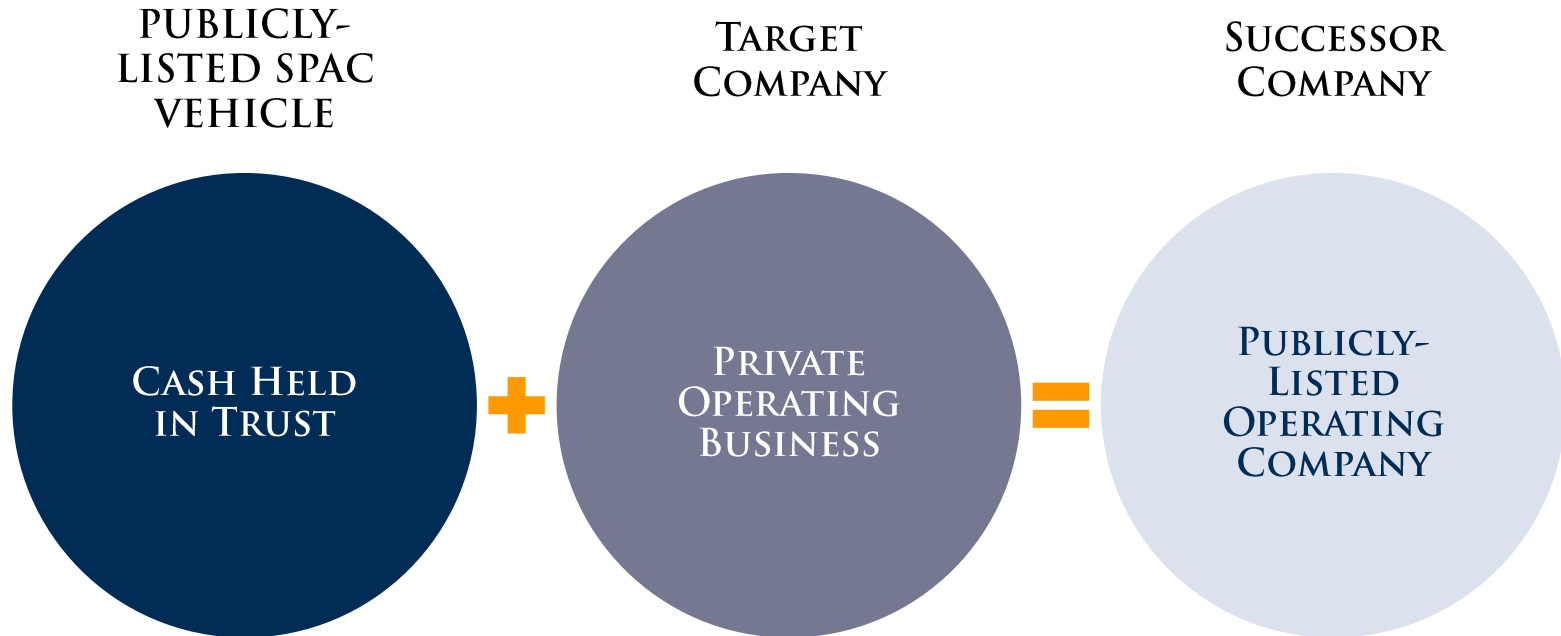

The strategy focuses on purchasing shares of common stock and units of Special Purpose Acquisition Companies (SPACs) that are trading at or below their pro rata share of the collateral trust account (i.e. trading at par value or at a discount), with the intent of disposing of the shares prior to, or at the time of, a business combination. We look at ourselves at 'renters' of SPACs, not owners. In other words, we aim to capture the fixed nature of pre-merger SPACs, along with the equity upside that they present, but we have no interest in being an equity investor post-business combination, which presents a much different risk/return profile akin to a traditional equity investment.

HOW SPACs WORK

WHAT IS A SPAC?

A Special Purpose Acquisition Company (“SPAC”) is a blank check company that raises money through an IPO to acquire a business within a specific period of time, otherwise the SPAC is required to liquidate and distribute all proceeds to the SPAC common stock shareholders.

SPACs are issued by Sponsors to raise cash via an IPO to acquire a private operating business. The IPO proceeds are held in a Trust and typically invested in U.S. government securities until a business combination or SPAC liquidation occurs.

Potential benefits for the Target:

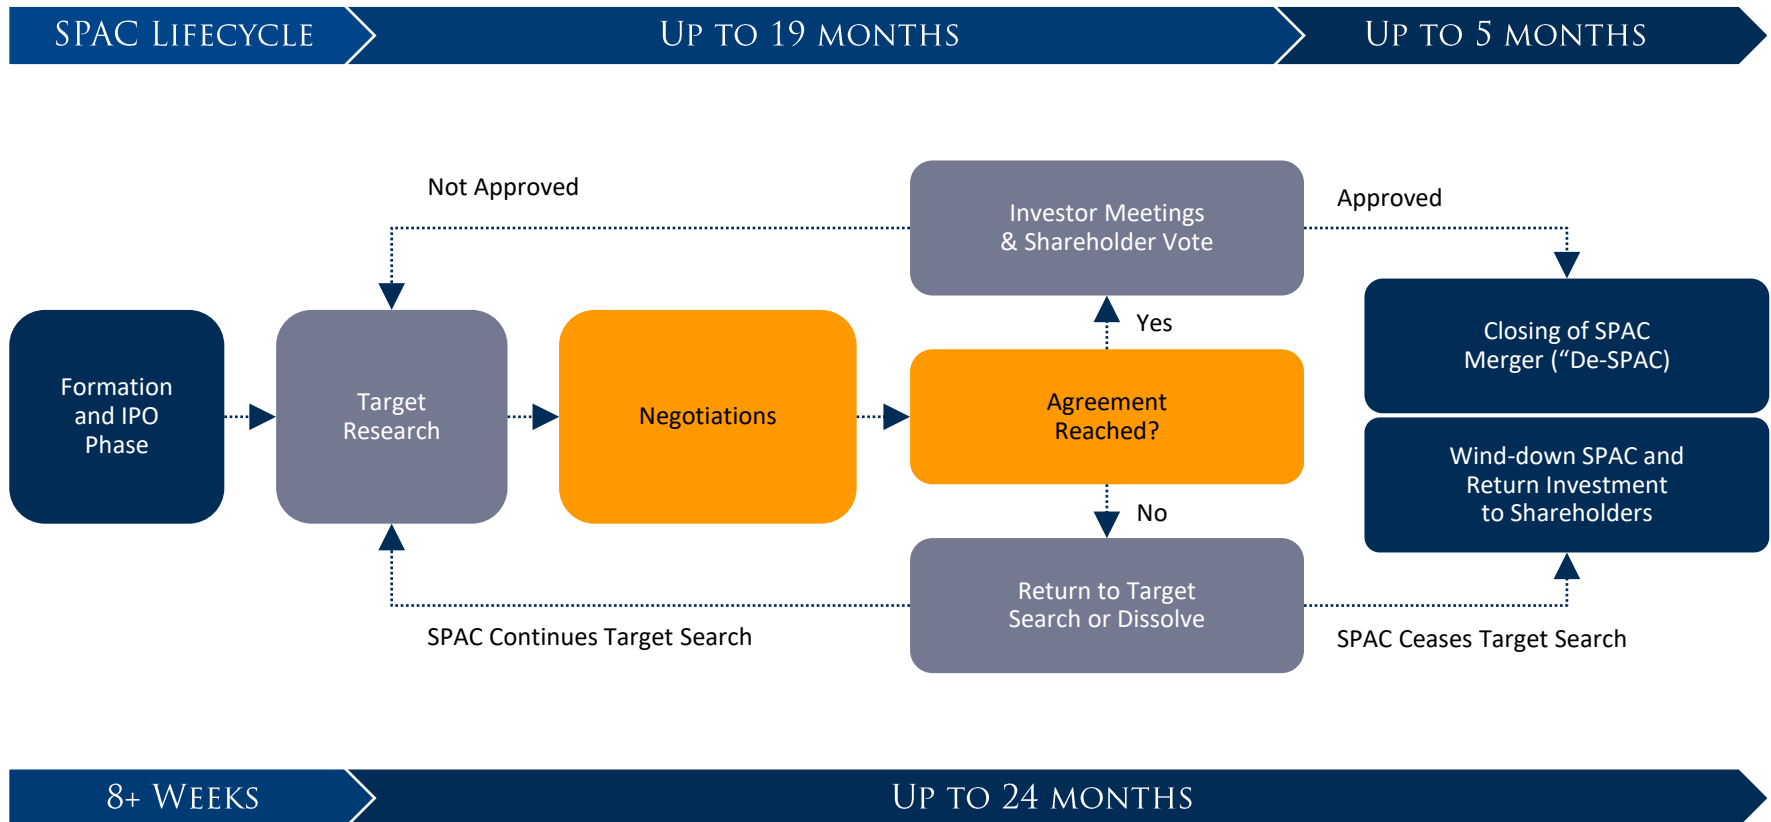

- Cheaper and faster alternative compared to traditional IPO
- Businesses that may not be good candidates for IPOs may be suitable targets for SPACs

Shareholder approval required for SPAC and Target business combination to become a publicly-listed company.

SPAC shareholders may redeem their shares for their pro rata interest of the Trust account while still voting in favor of the transaction.

QUARTER-END AS OF MARCH 31, 2024

	1 MONTH	3 MONTH	6 MONTH	YTD	1 YEAR	SINCE INCEPTION
ETF MARKET PRICE	0.42%	1.11%	2.09%	1.11%	5.39%	4.64%
ETF FUND NAV	0.40%	1.18%	2.28%	1.18%	5.46%	4.66%
ICE BOFA 0-3 U.S. TREASURY INDEX	0.36%	0.59%	2.75%	0.59%	3.69%	0.91%

The Fund's expense ratio is 0.80%. Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. Shares are bought and sold at market price not net asset value (NAV). Market price returns are based upon the closing composite market price and do not represent the returns you would receive if you traded shares at other times. Short term performance, in particular is not a good indication of future performance and an investment should not be made based solely on returns.

SPAC KEY TERMS

ACQUISITION TARGET	A private operating business that a SPAC looks to merge with or acquire (see below for Business Combination)
BLANK CHECK COMPANY	SPACs are also known as “blank check companies”. SPAC investors buy shares of a company that is funded with cash without the benefit of knowing the potential Acquisition Targets.
BUSINESS COMBINATION	The SPAC sponsor publicly announces a proposed business combination after an executed purchase agreement.
DE-SPACING	De-SPACing occurs once the business combination has been approved by shareholders and all other constituencies. The SPAC no longer exists and the newly formed public entity goes forward.
GROSS SPREAD	The amount at which a SPAC is trading at a discount or premium to its pro rata share of the collateral trust value. For example, if a SPAC is trading at \$9.70 and shareholders’ pro rata share of the trust account is \$10.00/share, the SPAC has a Gross Spread of 3% (trading at a 3% discount).
SPAC	A Special Purpose Acquisition Company (SPAC) is a ‘blank check company’ that raises money from investors through an IPO for the sole purpose of acquiring an existing private operating business within a specific period of time (generally up to two years).
SPAC UNITS & SHARES	A SPAC unit consists of a share of common stock and typically a portion of a warrant. Within 60 days following the IPO, the common stock and warrants may be bought and sold separately.
SPONSOR	The management company that forms the SPAC and provides the risk capital needed.
TRUST VALUE/ TRUST ACCOUNT	IPO proceeds raised by a SPAC are held in a trust account for the benefit of SPAC common stock shareholders. Typically, proceeds are invested in U.S. government securities until a business combination occurs. If no business combination occurs, SPAC common stock shareholders receive their pro rata interest of the trust account. In lieu of participating in the business combination, SPAC common stock shareholders have the right to redeem their shares for their pro rata interest in the trust account.
WARRANT	A warrant is a security that gives the holder the right to purchase common stock at a specific price within a specified period of time.
WEIGHTED AVERAGE PRICE	The weighted average price of the SPAC common stock shares and/or Units.
WEIGHTED AVERAGE YIELD (OR YIELD TO LIQUIDATION)	Similar to a bond’s Yield to Maturity, SPACs have a Yield to Liquidation/Redemption, which can be calculated using the Gross Spread and Time to Liquidation.
WEIGHTED AVERAGE MATURITY	Similar to a bond’s maturity date, SPACs also have a maturity, which is the defined time period in which they have to complete a business combination. This is referred to as the Liquidation or Redemption Date.

This Presentation must be preceded or accompanied by a prospectus. Please click [here](#) for the most current prospectus. The fund's investment objectives, risks, charges and expenses must be considered carefully before investing.

Past results may not be indicative of future performance.

Investing involves risk; Principal loss is possible. The Fund invests in equity securities and warrants of SPACs. Pre-combination SPACs have no operating history or ongoing business other than seeking Combinations, and the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable Combination. There is no guarantee that the SPACs in which the Fund invests will complete a Combination or that any Combination that is completed will be profitable. Unless and until a Combination is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial Combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a Combination even though a majority of its public stockholders do not support such a Combination. Some SPACs may pursue Combinations only within certain industries or regions, which may increase the volatility of their prices. The Fund may invest in SPACs domiciled or listed outside of the U.S., including, but not limited to, Canada, the Cayman Islands, Bermuda and the Virgin Islands. Investments in SPACs domiciled or listed outside of the U.S. may involve risks not generally associated with investments in the securities of U.S. SPACs, such as risks relating to political, social, and economic developments abroad and differences between U.S. and foreign regulatory requirements and market practices. Further, tax treatment may differ from U.S. SPACs and securities may be subject to foreign withholding taxes. Smaller capitalization SPACs will have a more limited pool of companies with which they can pursue a business combination relative to larger capitalization companies. That may make it more difficult for a small capitalization SPAC to consummate a business combination. Because the Fund is non-diversified it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, a decline in the value of an investment in a single issuer could cause the Fund's overall value to decline to a greater degree than if the Fund held a more diversified portfolio.

Diversification does not assure a profit nor protect against loss in a declining market. Current fund statistics may not be indicative of future positioning.

RISK CONSIDERATIONS

The Securities and Exchange Commission (SEC) does not approve, disapprove, endorse, nor indemnify any security

All ETF Data is sourced from Bloomberg.

Definitions: The ICE BofA 0-3 Year US Treasury Index tracks the performance of US dollar denominated sovereign debt publicly issued by the US government in its domestic market with maturities less than three years. SPACs Seeking a Target are SPACs that are actively engaged in searching for a business combination, but have not yet entered into a purchase agreement. SPACs with a Pending Deal are SPACs that have entered into a purchase agreement for a business combination, but still require shareholder approval and may have other conditions to close. Yield to Maturity is the annualized total return anticipated on a bond if the bond is held until it matures. Yield to Maturity is the total return anticipated on a bond if the bond is held until it matures. The SEC yield is a standard yield calculation developed by the U.S. Securities and Exchange Commission (SEC) that allows for fairer comparisons of bond funds. It is based on the most recent 30-day period covered by the fund's filings with the SEC. The yield figure reflects the dividends and interest earned during the period after the deduction of the fund's expenses. It is also referred to as the "standardized yield."
